Principles and Practice of Assisted Reproductive Technology

Principles and Practice of Assisted Reproductive Technology

This three volume set is a comprehensive guide to Assisted Reproductive Technology (ART) for clinicians. Volume one begins with an introduction to infertility, describing physiology, endocrinology and infertility in both men and women. The following sections provide in depth discussion on ART, from ovulation induction and intrauterine insemination, to complications, outcomes and ethical issues. The second volume is dedicated to In Vitro Fertilisation (IVF) and related procedures, whilst volume three is an atlas of embryology. This practical manual is an invaluable reference for clinicians specialising in infertility management and includes nearly 1000 full colour photographs, each with a brief description to enhance understanding. Key points * Three volume set - complete guide to ART * Each volume dedicated to specific topic - Infertility, IVF & Related Procedures, and Atlas of Embryology * Includes nearly 1000 photographs with descriptions * Invaluable reference for practising clinicians
