While Nazi Germany has been the subject of countless scholarly works, gender studies, as a category of analysis, has largely been neglected in interpretative surveys of Nazi Germany. This book examines the female half of the German population during the years of the Third Reich and asks why such a sizeable portion of the population was ready to rally around a movement both blatantly anti-feminist and determined to exclude women from public life. It explains how ordinary Germans translated Nazi beliefs into action and what factors, in addition to gender, influenced women's political choices between 1933 and 1945.
