Computer Integrated Manufacturing

A.N. Venkateshwaran Alavudeen

Computer Integrated Manufacturing A.N. Venkateshwaran Alavudeen

This up-to-date and accessible text deals with the basics of Computer Integrated Manufacturing (CIM) and the many advances made in the field. It begins with a discussion on automation systems, and gives the historical background of many of the automation technologies. Then it moves on to describe the various techniques of automation such as group technology and flexible manufacturing systems. The text describes several production techniques, for example, just-in-time (JIT), lean manufacturing and agile manufacturing, besides explaining in detail database systems, machine functions, and design considerations of Numerical Control (NC) and Computer Numerical Control (CNC) machines, and how the CIM system can be modelled. The book concludes with a discussion on the industrial application of artificial intelligence with the help of case studies, in addition to giving network application and signalling approaches.

Intended primarily as a text for the undergraduate and graduate students of mechanical, production, and industrial engineering and management, the text should also prove useful for the professionals in the field.

We recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to get every word into delight arrangement in writing Computer Integrated Manufacturing although doesn't forget the main point, giving the reader the hottest and based confirm resource details that maybe you can be among it. This great information could drawn you into fresh stage of crucial considering.

Ann Birdsell:

On this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become one of it? It is just simple method to have that. What you have to do is just spending your time almost no but quite enough to get a look at some books. One of the books in the top collection in your reading list is definitely Computer Integrated Manufacturing. This book and that is qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking upward and review this book you can get many advantages.

Bradley Harshbarger:

As a university student exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Computer Integrated Manufacturing can make you sense more interested to read.
