A detailed description and a drawing are given for each plant or plant family, along with its preferred habitats, its distribution within the state, and information on the edible parts. What makes Wild Food Plants of Indiana special are the dozens of tempting recipes. The pleasure of spring include wild asparagus soup, evening primrose roots in sweet and sour sauce, poke salad, wild onion broth with cornmeal dumplings, and spring beauty fondue. Early summer brings rose butter sandwiches, wild strawberry roly-poly, and steamed cattail spikes (which taste like corn on the cob). In July and August you can relish chokecherry cornbread, day lily fritters, mulberry wine, and juneberry shortcake. Among the riches of fall are creamy hickory nut soup, hazelnut bread, and pawpaw ice cream.
