Common Wealth: For a Free, Equal, Mutual, and Sustainable Society (Social Ecology & Change)

Martin Large

What social future do we want, and how do we get there? *Common Wealth* analyzes how the market has taken over the state and public services, while education and health have become "industries" and profit-making businesses. Toxic, neoliberal capitalism was unleashed during the 1980s and 1990s, only to crash in the worldwide financial melt-down beginning in 2007 and followed by public bail-outs of financial institutions.

Common Wealth proposes an alternative: a tripolar model of society, made up of government, civil society, and business, all of which work in cooperation to build a freer, more equitable, and sustainable society. The author describes ways of building common wealth, such as transforming capitalism for individual initiative and public benefit.
