S. Jane Flint, Vincent R. Racaniello, Glenn F. Rall, Anna Marie Skalka

**Principles of Virology: Volume 1 Molecular Biology** S. Jane Flint, Vincent R. Racaniello, Glenn F. Rall, Anna Marie Skalka

*Principles of Virology* is the leading virology textbook because it does more than collect and present facts about individual viruses. Instead, it facilitates an understanding of basic virology by examining the shared processes and capabilities of viruses. Using a set of representative viruses to present the complexity and diversity of a myriad of viruses, this rational approach enables students to understand how reproduction is accomplished by known viruses and provides the tools for future encounters with new or understudied viruses.

This fully updated edition represents the rapidly changing field of virology. A major new feature is the inclusion of 26 video interviews with leading scientists who have made significant contributions to the field of virology.

Applicable courses: undergraduate courses in virology and microbiology as well as graduate courses in virology and infectious diseases.
