Dacia: Landscape, Colonization and Romanization Ioana Oltean

Providing a detailed consideration of previous theories of native settlement patterns and the impact of Roman colonization, *Dacia* offers fresh insight into the province Dacia and the nature of Romanization.

It analyzes Roman-native interaction from a landscape perspective focusing on the core territory of both the Iron Age and Roman Dacia. Oltean considers the nature and distribution of settlement in the pre-Roman and Roman periods, the human impact on the local landscapes and the changes which occurred as a result of Roman occupation.

Dealing with the way that the Roman conquest and organization of Dacia impacted on the native settlement pattern and society, this book will find itself widely used amongst students of ancient Rome.
