Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies) David A. Vogan

This book is an expanded version of the Hermann Weyl Lectures given at the Institute for Advanced Study in January 1986. It outlines some of what is now known about irreducible unitary representations of real reductive groups, providing fairly complete definitions and references, and sketches (at least) of most proofs.

The first half of the book is devoted to the three more or less understood constructions of such representations: parabolic induction, complementary series, and cohomological parabolic induction. This culminates in the description of all irreducible unitary representation of the general linear groups. For other groups, one expects to need a new construction, giving "unipotent representations." The latter half of the book explains the evidence for that expectation and suggests a partial definition of unipotent representations.

From reader reviews:

Hugo Mann:

Have you spare time for the day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a wander, shopping, or went to the Mall. How about open or read a book entitled Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies)? Maybe it is to be best activity for you. You realize beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

John Lien:

Now a day individuals who Living in the era everywhere everything reachable by match the internet and the resources inside it can be true or not need people to be aware of each info they get. How people have to be smart in acquiring any information nowadays? Of course the reply is reading a book. Studying a book can help people out of this uncertainty Information especially this Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies) book because book offers you rich details and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it everbody knows.

Neil Calvert:

Hey guys, do you desires to finds a new book to see? May be the book with the concept Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies) suitable to you? The actual book was written by popular writer in this era. The actual book untitled Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies) is the one of several books that everyone read now. This specific book was inspired many people in the world. When you read this e-book you will enter the new dimension that you ever know just before. The author explained their thought in the simple way, so all of people can easily to recognise the core of this book. This book will give you a lots of information about this world now. To help you see the represented of the world with this book.

Diane Morgan:

People live in this new time of lifestyle always try and and must have the time or they will get large amount of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not really a huge robot. Then we question again, what kind of activity have you got when the spare time coming to an individual of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative within spending your spare time, the actual book you have read is Unitary Representations of Reductive Lie Groups. (AM-118) (Annals of Mathematics Studies).
