Before use, standard Erp systems such as Sap R/3 need to be customized to meet the concrete requirements of the individual enterprise. This book provides an overview of the process models, methods, and tools offered by Sap and its partners to support this complex and time-consuming process. It begins by characterizing the foundations of the latest Erp systems from both a conceptual and technical viewpoint, whereby the most important components and functions of Sap R/3 are described. The main part of the book then goes on to present the current methods and tools for the R/3 implementation based on newer process models (roadmaps).
