Network Programming with Perl

Lincoln D. Stein

Network Programming with Perl Lincoln D. Stein

Any developer who's comfortable with Perl can build remarkably powerful TCP/IP network applications -- no C required! In *Network Programming with Perl*, Lincoln Stein shows how, step-by-step, with extensive code examples. Modeled on W. Richard Stevens' legendary Unix network programming book, this book opens up network programming to a new generation of programmer: Web developers ready to build serious network applications and solve complex network problems. Stein begins with an overview of Perl's increasingly powerful networking facilities; then introduces Berkeley Sockets, and the UDP and TCP protocols at the heart of network programming. He presents Perl's IO::socket API, which simplifies the creation and use of sockets; demonstrates how to create forking servers; and introduces practical techniques for creating multithreaded and multiplexed applications. Modeled upon the style of Stevens, and using extensive sample code, Stein demonstrates all of the key features. *Network Programming with Perl* also includes chapter-length explanations of creating Internet modules for FTP and Telnet; Mail and News; and Web services.

From reader reviews:

Robert Crawford:

Nowadays reading books become more and more than want or need but also work as a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want attract knowledge just go with knowledge books but if you want truly feel happy read one with theme for entertaining like comic or novel. The Network Programming with Perl is kind of reserve which is giving the reader unstable experience.

Lewis Skinner:

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are experiencing problem with the book than can satisfy your short time to read it because all this time you only find e-book that need more time to be learn. Network Programming with Perl can be your answer since it can be read by you actually who have those short free time problems.

Ryan Dewitt:

Reading a book to get new life style in this 12 months; every people loves to study a book. When you learn a book you can get a lot of benefit. When you read guides, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. In order to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, along with soon. The Network Programming with Perl will give you a new experience in reading a book.

Lee Villegas:

Some individuals said that they feel uninterested when they reading a book. They are directly felt this when they get a half parts of the book. You can choose typically the book Network Programming with Perl to make your personal reading is interesting. Your skill of reading ability is developing when you like reading. Try to choose simple book to make you enjoy to study it and mingle the sensation about book and studying especially. It is to be 1st opinion for you to like to open up a book and learn it. Beside that the publication Network Programming with Perl can to be your new friend when you're sense alone and confuse using what must you're doing of their time.
