**Spectacular specimens: Albertus Seba's unrivaled catalog of animals, insects and plants**

The *Cabinet of Natural Curiosities* is one of the 18th century's greatest natural history achievements and remains **one of the most prized natural history books of all time**. Though scientists of his era often collected natural specimens for research purposes, Amsterdam-based pharmacist **Albertus Seba** (1665–1736) was unrivaled in his passion. His amazing collection of animals, plants and insects from all around the world gained international fame during his lifetime.

In 1731, after decades of collecting, Seba commissioned careful and often scenic illustrations of every specimen. With these meticulous drawings, he arranged for the publication of a four-volume catalog, covering the entire collection from **strange and exotic plants to snakes, frogs, crocodiles, shellfish, corals, birds, and butterflies**, as well as **now extinct creatures**.

This reproduction is taken from **a rare, hand-colored original**. The introduction supplies background information about the fascinating tradition of natural collections to which Seba's curiosities belonged.

Text in English, French, and German
