Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood Mrs Marcet

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1829 edition. Excerpt: ...Mr. B. Undoubtedly; when oxygen loses its gaseous form, in order to combine with a solid body, it becomes condensed, and the caloric evolved produces the elevation of temperature. (The specific gravity of bodies is at the same time altered by chemical combination; for in consequence of a change of capacity for heat, a change of density must be produced. Caroline. That was the case with the sulphuric acid and water, which, by being mixed together, gave out a great deal of heat, and increased in density. 718. How do acids ending in ic differ from those ending in out f 719. What is the fourth law of chemical attraction? 720. From what does the change of temperature arise? 721. What is an instance of increase of temperature from chemical union? 722. Is the specific gravity of bodies affected by chemical combination: Mrs. B. The fifth law of chemical attraction is, that the properties which characterize bodies, when separate, are altered or destroyed by their combination? Caroline. Certainly! What, for instance, can be so different from water, as the hydrogen and oxygen gases? Emily. Or what more unlike sulphat of iron, than iron or sulphuric acid? Mrs. B. Every chemical combination is an illustration of this rule. But let us proceed---The sixth law is, that the force of chemical affinity between the constituents of a body, is estimated by that which is required for their separation. This force is not always proportional to the facility with which bodies unite; for manganese, for instance, which you know, is so much disposed to unite with oxygen, that it is never found in a metallic state, yields it more easily than any other metal. Emily. But, Mrs. B., you speak of estimating the force of attraction between bodies, by the force required to separate...

From reader reviews:

Linda Griffin:

What do you consider book? It is just for students because they are still students or the idea for all people in the world, the particular best subject for that? Just simply you can be answered for that question above. Every person has diverse personality and hobby for every single other. Don't to be pressured someone or something that they don't wish do that. You must know how great along with important the book Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood. All type of book is it possible to see on many options. You can look for the internet resources or other social media.

Adam Gutierrez:

Typically the book Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood will bring you to the new experience of reading some sort of book. The author style to describe the idea is very unique. If you try to find new book to study, this book very acceptable to you. The book Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood is much recommended to you you just read. You can also get the e-book from official web site, so you can quicker to read the book.

Jack Nguyen:

With this era which is the greater man or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple solution to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. One of the books in the top list in your reading list is usually Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood. This book that is qualified as The Hungry Hills can get you closer in growing to be precious person. By looking upwards and review this reserve you can get many advantages.

Mandy Jackson:

You will get this Conversations on Chemistry; In Which the Elements of That Science Are Familiarly Explained, and Illustrated by Experiments, and 38 Engravings on Wood by check out the bookstore or Mall. Only viewing or reviewing it could possibly to be your solve problem if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by means of written or printed but also can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose proper ways for you.
