Traces Of The Past: Unraveling The Secrets Of Archaeology Through Chemistry (Contemporary Issues in Museum Cultures (Paperback)) Joseph B. Lambert

Where Stonehenge's giant bluestones come from? Was the fall of the Roman Empire hastened by lead poisoning? How did amber get from the Baltic to Belize? In exploring these and other historical enigmas, Joseph Lambert expertly details the rich insights into ancient life that chemistry alone can provide. Using cutting-edge scientific methods such as radiocarbon dating, DNA analysis, and elemental fingerprinting, acclaimed chemist Joseph Lambert expertly details the rich insights into ancient life that chemistry alone can provide. He shows, for example, how investigators today can determine the diet of prehistoric Europeans, the geographical origin of the marble in a Greek statue, or the reason why the Liberty Bell cracked. He uses nuclear magnetic resonance spectroscopy to reconstruct ancient trade routes, and X-ray diffraction, among other methods, to compare the color palettes of the Mesopotamians and Egyptians (the latter were apparently much more flamboyant). He explains how chemical analysis of DNA can be used to sort out human lineages and migratory patterns—demographic trends that affected, in turn, everything from language to the spread of disease. Chemistry takes center stage in this fascinating book, proving that it is not just an analyst of culture, it stands as one of its primary creators. Lambert offers us a unique glimpse into a form of technical progress hitherto unappreciated: the ever-increasing ingenuity of the Human race, as seen through the prism of its evolving chemical sophistication. We discover how primitive chemistry was initially used by ancient people as a tool to improve their daily lives, a feat that was achieved by reworking molecules of clay into pottery and minerals into metal alloys, and by turning grains into beer and pitch into sealants. By documenting the way ancient people manipulated their environment chemically, Lambert further refines the distinguishing feature of our species. Early humans were more than tool-makers. They were molecular transformers.

From reader reviews:

Norman Eiland:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each guide has different aim or maybe goal; it means that e-book has different type. Some people experience enjoy to spend their time to read a book. They may be reading whatever they acquire because their hobby will be reading a book. Why not the person who don't like reading through a book? Sometime, man or woman feel need book if they found difficult problem or even exercise. Well, probably you'll have this Traces Of The Past: Unraveling The Secrets Of Archaeology Through Chemistry (Contemporary Issues in Museum Cultures (Paperback)).

Gerald Stewart:

Nowadays reading books be than want or need but also work as a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge your information inside the book this improve your knowledge and information. The data you get based on what kind of e-book you read, if you want send more knowledge just go with education books but if you want feel happy read one together with theme for entertaining including comic or novel. The Traces Of The Past: Unraveling The Secrets Of Archaeology Through Chemistry (Contemporary Issues in Museum Cultures (Paperback)) is kind of guide which is giving the reader unpredictable experience.

Myrtle Brown:

Playing with family within a park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. I activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Traces Of The Past: Unraveling The Secrets Of Archaeology Through Chemistry (Contemporary Issues in Museum Cultures (Paperback)), you may enjoy both. It is great combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its referred to as reading friends.

Katie Duffy:

Is it anyone who having spare time after that spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Traces Of The Past: Unraveling The Secrets Of Archaeology Through Chemistry (Contemporary Issues in Museum Cultures (Paperback)) can be the reply, oh how comes? The new book you know. You are and so out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these books have than the others?
