Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science)

Sustainable development is the key for the survival in 21st century. The natural resources are finite and cannot be used with impunity because we are the custodian of these resources and have responsibility to pass these to the next generation. This monumental task requires several major commitments and most important of them is to arrest population explosion which has already reached seven billion. Natural resources like air to breath, food to eat, and water to drink, and fossil fuel to maintain this life style are being overexploited. Unrestrained consuming culture will accelerate undesired situation. This situation will have more dire consequences in resource limited ecosystems like dry lands. Given the severe scarcity of water, ever increasing population and soil salinization out of the box solutions for the provision of food and clean energy is required to spare meager fresh water resources for conventional agriculture. This volume contains a number of articles dealing with halophyte ecology, bio-geography, ecophysiology, hyper-saline soils, biofuels, biosaline agriculture, biosaline landscaping, climate change mitigation, and biodiversity. It also contains the communication of innovative ideas, such as the research into floating mangroves, seagrass terraces, as well as a World Halophyte Garden containing all known salt-tolerant plant species. It is hoped that the information provided will not only advance vegetation science, but that it will truly generate more interdisciplinarity, networking, awareness, and inspire farmers, and agricultural and landscaping stakeholders to seriously engage in halophyte cash crop production in coastal hyper-saline areas.

From reader reviews:

Joshua Johnson:

Book is actually written, printed, or outlined for everything. You can know everything you want by a e-book. Book has a different type. We all know that that book is important factor to bring us around the world. Beside that you can your reading expertise was fluently. A guide Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) will make you to always be smarter. You can feel more confidence if you can know about almost everything. But some of you think this open or reading a new book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you looking for best book or acceptable book with you?

Doyle Swoope:

As people who live in typically the modest era should be change about what going on or details even knowledge to make these keep up with the era that is always change and progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to a person is you don't know what type you should start with. This Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

Dorothy Penland:

The reserve untitled Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) is the e-book that recommended to you you just read. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of research when write the book, therefore the information that they share for you is absolutely accurate. You also will get the e-book of Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) from the publisher to make you more enjoy free time.

Tanya McNeil:

Your reading 6th sense will not betray anyone, why because this Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) reserve written by well-known writer we are excited for well how to make book that may be understand by anyone who all read the book. Written inside good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still hesitation Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) as good book not only by the cover but also with the content. This is one book that can break don't determine book by its deal with, so do you still needing one more sixth sense to pick this particular!? Oh come on your looking at sixth sense already said so why you have to listening to a different sixth sense.
